

## HOW TO USE THE "HEALTH & SAFETY" TEMPLATE COLLECTION

This is a comprehensive course about common health & safety topics at the workplace, such as 5S, First Aid, Forklift Trucks, Conveyor Interaction, Safety Knives, Pedastrian Trucks and many more.

### Learning Objectives

Workers will be able to recognise potential hazards and understand how to **minimise risks**. They will understand safety procedures and protocols and be able to respond to emergency situations. They also know how to properly use personal protective equipment and understand its importance in protecting themselves and others. They demonstrate **safe work practices** and understand their roles and responsibilities in maintaining a safe workplace.

### Test your Employees Knowledge

With **19 already built-in Quizzes**, you can see how well your Employees have understood the material. You can add the option to get signed **certificates** at the end of the course.

### Benefits

By using our Template Collection, you save Time and Energy! We have prepared **19 sequences** with **200 customizable steps**, and the best thing is: you'll be **ISO Certified!**

### Ready to Use!

Our Templates are ready to use **NOW!** You can access them by contacting how.fm. Then we can provide you with additional videos of the template and more information on the specific steps! Get the Template and download our App, and **1 hour** later, your employees have finished the courses!
